

IN THE CLAIMS

The following is a complete listing of revised claims with a status identifier in parenthesis. Claims 1-3, 6, 11, 12, 18, 24-37, 39, 40, 43, 44 and 47-49 have been cancelled without prejudice to, or disclaimer of, their subject matter.

LISTING OF CLAIMS

1. (Cancelled).
2. (Cancelled).
3. (Cancelled).
4. (Currently Amended) A method as in claim [[49]] 50 , wherein said group further includes receipt of a message from a wireless audio source.
5. (Currently Amended) A method as in claim [[1]] 50, wherein said group further includes designated triggering event is a particular date and time.
6. (Cancelled).
7. (Currently Amended) A method as in claim [[49]] 50, wherein said group further includes receipt of an electronic message at a wireless audio source.
8. (Currently Amended) A method as in claim [[49]] 50, wherein said group further includes [[is]] a request to communicate via a mobile telephone.

9. (Currently Amended) A method as in claim [[49]] 45, wherein said wireless audio sources are in RF communication with said wireless receiver.

10. (Original) A method as in claim 9, wherein said wireless receiver and said wireless audio sources are Bluetooth™ compliant.

11. (Cancelled).

12. (Cancelled).

13. (Previously Presented) A method as in claim 50, further comprising selecting at least another of said received audio signals for output to said headset after said triggering event has concluded.

14. (Previously Presented) A method as in claim 50, wherein said selecting is performed according to a plurality of selection instructions.

15. (Original) A method as in claim 14, wherein each of said selection instructions is associated with a respective electronic device so that selection of a particular electronic device occurs in response to a triggering event included in the associated selection instruction.

16. (Currently Amended) A method as in claim [[12]] 50, wherein said group further includes designated triggering event is a chronological event.

17. (Previously Presented) A method as in claim 50, wherein said group further includes a mobile telephone transmission.

18. (Cancelled).

19. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a mobile telephone.

20. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is an AM/FM radio.

21. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a compact disc (CD) player.

22. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a walkie-talkie radio.

23. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a personal computer.

24. (Cancelled).

25. (Cancelled).

26. (Cancelled).

27. (Cancelled).

28. (Cancelled).

29. (Cancelled).

30. (Cancelled).

31. (Cancelled).

32. (Cancelled).

33. (Cancelled).

34. (Cancelled).

35. (Cancelled).

36. (Cancelled).

37. (Cancelled).

38. (Previously Presented) A method of switching among wireless audio sources, comprising:

receiving a plurality of Bluetooth™ compliant transmissions, each including a respective input audio signal, from respective electronic devices; and

selecting at least one of said received audio signals for output to a headset in accordance with at least one stored selection instruction overlaid on another audio signal, said selection instruction specifying a designated triggering event for triggering said selection,

wherein said designated triggering event is receipt of an advertising message from a merchant.

39. (Cancelled).

40. (Cancelled).

41. (Currently Amended) A method of switching among wireless audio sources, comprising:

receiving a plurality of Bluetooth™ compliant transmissions, each including a respective input audio signal from the same network, from respective electronic devices; and

selecting at least one of said received audio signals, for output to a headset, overlaid on another audio signal in accordance with at least one stored selection instruction, said selection instruction specifying a designated triggering event for triggering said selection.

42. (Previously Presented) The method as in claim 41 wherein the network comprises a piconet.

43. (Cancelled).

44. (Cancelled).

45. (Currently Amended) A programmable audio output device, comprising:
a wireless receiver which receives a plurality of audio signals from the same network transmitted from respective wireless audio sources;
a storage device that stores at least one selection instruction which specifies a designated triggering event for triggering said selection;

a programmable switch coupled to said storage device and said wireless receiver that selects one of said plurality of audio signals for output according to said at least one stored selection instruction and said designated triggering event; and

a headset for supporting said wireless receiver, said storage device, said programmable switch and at least one headset speaker, said at least one headset speaker being coupled to said programmable switch to aurally reproduce said one of said plurality of audio signals, selected for output, overlaid on another audio signal.

46. (Previously Presented) The device as in claim 45 wherein the network comprises a piconet.

47. (Cancelled).

48. (Cancelled).

49. (Cancelled).

50. (Currently Amended) A method of switching among wireless audio sources, comprising:

receiving a plurality of Bluetooth™ compliant transmissions, each including a respective input audio signal, from respective electronic devices; and

selecting at least one of said received audio signals, for output to a headset in accordance with at least one stored selection instruction, overlaid on another audio signal, said selection instruction specifying a designated triggering event for triggering said selection,
